INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/28438

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

| | | |
|-------------------------------|--|-----|
| Novelty (N) | Claims <u>2, 8-13, 21 and 26</u> | YES |
| | Claims <u>1, 3-7, 14-20, 22-25 and 27-42</u> | NO |
| Inventive Step (IS) | Claims <u>2 and 13</u> | YES |
| | Claims <u>1, 3-12 and 14-42</u> | NO |
| Industrial Applicability (IA) | Claims <u>1-42</u> | YES |
| | Claims <u>NONE</u> | NO |

2. Citations and Explanations (Rule 70.7)

Claims 1, 3-7, 14-20, 22-25 and 27-42 lack novelty under PCT Article 33(2) as being anticipated by Coulon et al (WIPO 02/01102) which illustrates the present invention with expanded threaded members (11, 12) and groove (21 or 14) which will inherently act as a stress concentrator during expansion.

Claim 42 lacks novelty under PCT Article 33(2) as being anticipated by Schafer et al (US 5,667,252). Refer to Figure 2 which illustrates the members (200, 202) expanded and sealed together.

Claims 8-12, 21 and 26 lack an inventive step under PCT Article 33(3) as being obvious over Coulon et al (WIPO 02/01102) in view of LeBegue et al (US 6,390,720). It would have been obvious to a person having ordinary skill in the art to modify Coulon et al's groove (21) to be plural, helical, or internal such as taught by LeBegue et al (see column 2, lines 55-65) inasmuch as such changes are considered to be merely a matter of choice in known design depending on intended use.

Claims 2 and 13 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a separate grooved sleeve stress concentrator in an expandable threaded coupling.

Claims 1-42 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
